

Unit Level Driver Diagrams

Julia Wood and Karen Hooper

Driver Diagrams

- Put simply a Driver Diagram is a strategy on a page.
- A Driver Diagram outlines:

Overarching aim	The overall outcome you plan to achieve: 85% uptake of magnesium sulphate with a stretch target of 95% by 31st July 2019, demonstrating three months at or above target
Primary drivers	The areas of the system which need to be changed
Secondary drivers	Areas of work which need to be completed to ensure delivery on the primary drivers
Change ideas	Change ideas are determined from the secondary drivers. They are specific actions (i.e. the areas of change) that you hope will result in improvement. They are small scale changes, which are easy to implement and ideally measurable
