The ordinary response to atrocities is to banish them from consciousness. Certain violations of the social compact are too terrible to utter aloud: The psychological distress symptoms of traumatized people simultaneously call attention to the existence of an unspeakable secret and deflect attention from it.

Supporting implementation

What type of problems are we trying to solve?

Simple

Baking a Cake

Right "recipe" essential
Gives same results every time

Complicated

Sending a Rocket to the Moon

"Formulas" needed
Experience built over time and can
be repeated with success

Complex

Raising a Child

No "right" recipes or protocols
Outside factors influence
Experience helps, but doesn't
guarantees success
