Aim/s

To reduce the number of women smoking at delivery by 8% by 31st March 2020

To achieve 100% compliance for all midwives to have smoking cessation training by 31st March 2020

For 100% of woman to have a CO reading performed at booking by 31st March 2020

To reduce the FTA rate for those women who have committed to a SS programme

To increase the proportion of women who set a quit date by 10% by 31st March 2020

Measurement

- You will probably need to use more than one slide for the measurement section
- Include here your measures, identifying which are outcome, process and balancing.
- Include graphs in run charts/SPC charts showing:
 - Progress is you are a wave 1 or 2 team
 - Baseline data if you are a wave 3 team
- **If you need support with completing this section please let me know – happy to help**

PDSAs and achievements

- First PDSA – all midwives to be trained on monthly DTP (directorate training programme)
- Second PDSA – change training to be community specific, monthly training in community teams which will take 4 months then train hospital staff
- Obtain baseline data for original needs, ask for more baseline data to answer questions which have arisen from more questions

SCORE Survey

- Wave 3:
- Senior team have reviewed SCORE results but nothing has been fed back to the workforce
- Made difficult by merger of 2 trusts, a lot of upheaval and many staff having to re-apply for their own jobs

Key challenges of the MatNeo Collaborative so far

- What have been the key challenges you have faced so far?
- Very little/ no protected time
- Merger of 2 trusts making working life very difficult with extra pressures/ increased workload/ lack of support and increased stress levels of all staff regardless of grade

Key successes of the MatNeo Collaborative so far

- What have been the key successes you have achieved so far?
- Home group of dedicated staff who want to achieve our aims who are working hard

Next steps

- To be completed by wave 1 & 2 teams only – outline your plans for future projects
