

Great North Pharmacy Research Collaborative

4th Annual Regional Conference: Technology: the great pharmacy enabler

9 July 2021 1pm – 5pm – Online

@GtNorthPharmRes #gnpharmconf21

Agenda

Registration and Virtual Poster Viewing		
13:00–13:15	Registration and Virtual Poster Viewing	
13:15–13:20	Chairs Welcome	Dr Wasim Baqir National Pharmacy Advisor: Pharmacy Integration Programme Primary Care, Community Services and Strategy Directorate NHS England and Improvement
	Pre-Registration Presentations:	
13:20 -13:25	Investigating the Effects of COVID-19 on High INR Readings	Megan Blenkinship Pre-Registration Pharmacist South Tyneside and Sunderland NHS Foundation Trust
13:25-13:30	An Audit Assessing the Appropriateness of Controlled Drug Destruction and its Relevant Documentation	Aidan Bowler Pre-Registration Pharmacist North Tees and Hartlepool NHS Foundation Trust
13:30-13:35	Evaluating the Quality of Patient Follow-Up Post-Myocardial Infarction: An Audit of ACE inhibitor/ARB and Beta-Blocker Up-Titration in Primary Care	Caitlyn Madden Pre-Registration Pharmacist Northumbria Healthcare NHS Foundation Trust
13:40-13:45	An Assessment of the Electronic Documentation of Medicine Reconciliation	Sabrina Mahmoud Pre-Registration Pharmacist North Tees and Hartlepool NHS Foundation Trust
13:45-13:50	Auditing the Prescribing of Oral Tetracycline's for the Management of Acne in Patients >12 Years Old in a GP Surgery	Hannah McMillan Pre-Registration Pharmacist North Cumbria Integrated Care NHS Foundation Trust
13:50–14:05	Q&As with the Pre-Registration Pharmacist Finalists	

14:05-14:20	Comfort Break and Virtual Poster Viewing	
14:20-14:45	Keynote Speaker – Integrated Medicine in the Digital Age	Professor Graham Evans Chief Information and Technology Officer/SIRO, North Tees and Hartlepool NHS Foundation Trust Chief Digital Officer NENC, Integrated Care System Honorary Professor, Teesside University
14:50-15:30	<p>Breakout Session One</p> <p>Technology Enabled Research Gemma Donovan, Academic Practitioner in Pharmacy Practice School of Pharmacy, Pharmaceutical and Cosmetic Sciences, University of Sunderland</p> <p><i>This workshop will provide an introduction to using routinely collected digital healthcare data for the purposes of research, evaluation or quality improvement. This will include what data sources may be helpful for medicines-related research, the potential limitations of using this data and examples of how it's use can be optimised to appropriately answer research questions.</i></p> <p>From finding my feet to discovering my passion: my journey through mental health Pharmacy Laura Stavert, Advanced Pharmacist Practitioner Cumbria, Northumberland, Tyne and Wear NHS Foundation Trust</p> <p><i>Laura will be exploring her beginnings in psychiatry starting 10 years ago, talking about working independently as the only Pharmacist in a community mental health team and her future ambitions as a clinical academic combining expert clinical practice and research.</i></p> <p>Improving Cancer with Data – a journey to consultancy pharmacy Calum Polwart, Specialist Cancer Pharmacist South Tees Hospitals NHS Foundation Trust</p> <p><i>Calum will describe some of his work he has undertaken using data, often already routinely being collected, to reduce waste, assure patient safety or measure clinical outcomes of anti-cancer treatments. He will describe how this form of research can help advanced practitioners develop their research skills and progress towards Consultant Level Practice without the need to spend a lifetime gathering data. While Calum will show the power of joining data from multiple data sources, he promises to try and keep the technical data at a fairly low level of geekiness! He will also discuss the need to exclude patients who have chosen for their routinely collected data to not be used for research purposes, and how this can happen in practice.</i></p> <p>Community Pharmacy: How can we work better together? Richard Brown, Chief Officer Avon LPC</p> <p><i>The workshop will look to explore how GP Surgeries and Pharmacies can work closer together. With a combined interest to support the health and wellbeing of their community, pharmacies and surgeries can both provide support in a cohesive way. For example, to support practices, the use of the NHS Community Pharmacist Consultation Service allows patients to be referred to their pharmacist for a common ailment to free up appointments for more complex patents. This year, it is anticipated that flu vaccinations will reach their highest demand, especially with the additional age cohorts. With a collaborative plan, surgeries and pharmacies can ensure maximum penetration into these groups along with planning for the potential C19 vaccination boosters. Lastly, everyday, patients are discharged from hospital and we know it can go wrong if all communication channels are not working effectively. The Discharge Medicines Service allows community pharmacies, working with their PCN pharmacist to ensure better outcomes are achieved.</i></p>	
15:30-15:50	Keynote Speaker – Taking the pharmacy workforce forward in a digital world	Dr Jane Brown Pharmacy Dean Health Education England

15:50–15:55	Comfort Break	
15:55–16:35	Breakout Session Two as above	
16:35-16:45	<p>Presentation of Awards</p> <p>1st Place: Pre reg Poster Presented by Anne Henry, Advanced Pharmacist Training Programme Director - North East, and Kay Fenwick, Pre-Registration Pharmacist Training Programme Director – North East Health Education England</p> <p>1st Place: Pre- reg Presentation Presented by Jessica Hardisty, Associate Dean, Pre-Registration Training Health Education England 6</p> <p>1st Place: Non Pre- reg Poster Presented by Will Horsley, Pharmacy Lead for Specialised Commissioning NHS England & Improvement</p>	
16:45-17:00	Closing Remarks	Dr Wasim Baqir National Pharmacy Advisor: Pharmacy Integration Programme Primary Care, Community Services and Strategy Directorate NHS England and Improvement
17:00–18:00	Virtual Networking and Drinks	

In association with:
