Leadership

Clinical

Career Pathway

Growing Occupational Health and Wellbeing services can only happen through attracting, developing and retaining staff working in this area. The Pilot will invest in staff to form a Career Pathway with Clinical and Leadership training opportunities at every level.

Clinical courses will look at using the apprenticeship levy paid by the Trust to enable free learning opportunities at the point of access. There will be induction competencies for new staff and Occupational Health Courses to progress skills.

Leadership courses will be free and provided at every level using local and national programs
