

# Growing OH and Wellbeing NENC

## November project update

### What happened in October?

Sima (Project Coordinator) and Mark (Project Manager) visited the Occupational Health (OH) teams at **North Tees and Hartlepool NHS Foundation Trusts and South Tees Hospitals NHS Foundation Trust**. It was great to meet all OH team members and develop relationships with staff to take the project forward.

On 12.10.21 the **Growing Occupational Health Steering Group** met with representatives from each trust at the Durham Centre to discuss the new service model, digital solutions and metrics. It was agreed the group will meet monthly to steer the progress of the project in the coming months.

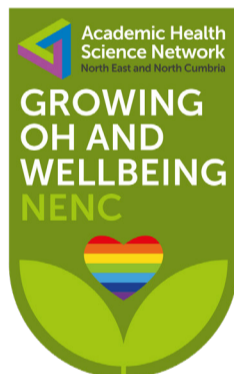

### Logos

We would like you to vote for the logo that is your favourite. The winner will be part of the **Growing OH and Wellbeing** branding in the coming months.

Each logo contains a heart in the middle, with rainbow colours which is synonymous with celebrating the NHS workforce during the COVID-19 pandemic. The heart represents us caring for the health and wellbeing of our staff. The leaf represents our ambition to 'grow' occupational health and wellbeing services in the coming years.

[Vote for your favourite here before the end of the month](#)

### Project Design

In the next phase of the project we will set-up task and finish groups to co-design the services provided by the new Occupational Health and Wellbeing Service. These groups, covering the below service areas, will meet monthly with a representative from each trust to discuss best practice and help design pathways of care. If you want to be involved in these groups, please let your Occupational Health Lead know.

### Date for the diary

We're hosting a virtual project update and Q&A session on Monday 22nd November, 12-1pm, and we'd love to see you all there.

[Join us on the day via this Teams link.](#)
